

Calculate, Communicate & Compare
Your Cyber Exposure

Jens Freitag | Senior Security Specialist

When business leaders ask

“HOW SECURE ARE WE?”

They don't want a 300 page answer

The Four Key Questions...

Where are we exposed?

What should we focus on first?

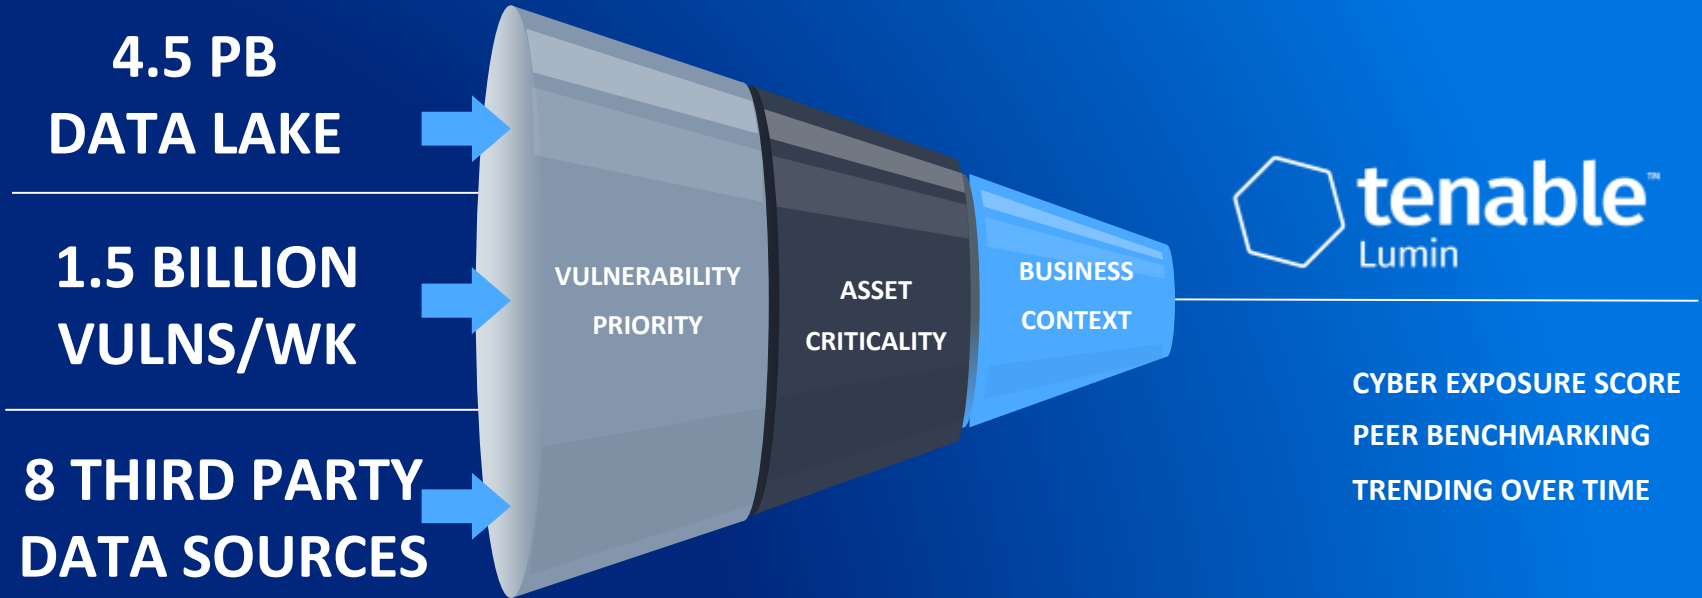

How are we reducing exposure over time?

How do we compare to our peers?

Lumin

Cyber Exposure and Lumin

CALCULATE

Advanced analysis and risk-based exposure scoring weighs asset value and criticality, vulnerabilities, and threat context – **providing clear guidance about what to focus on**

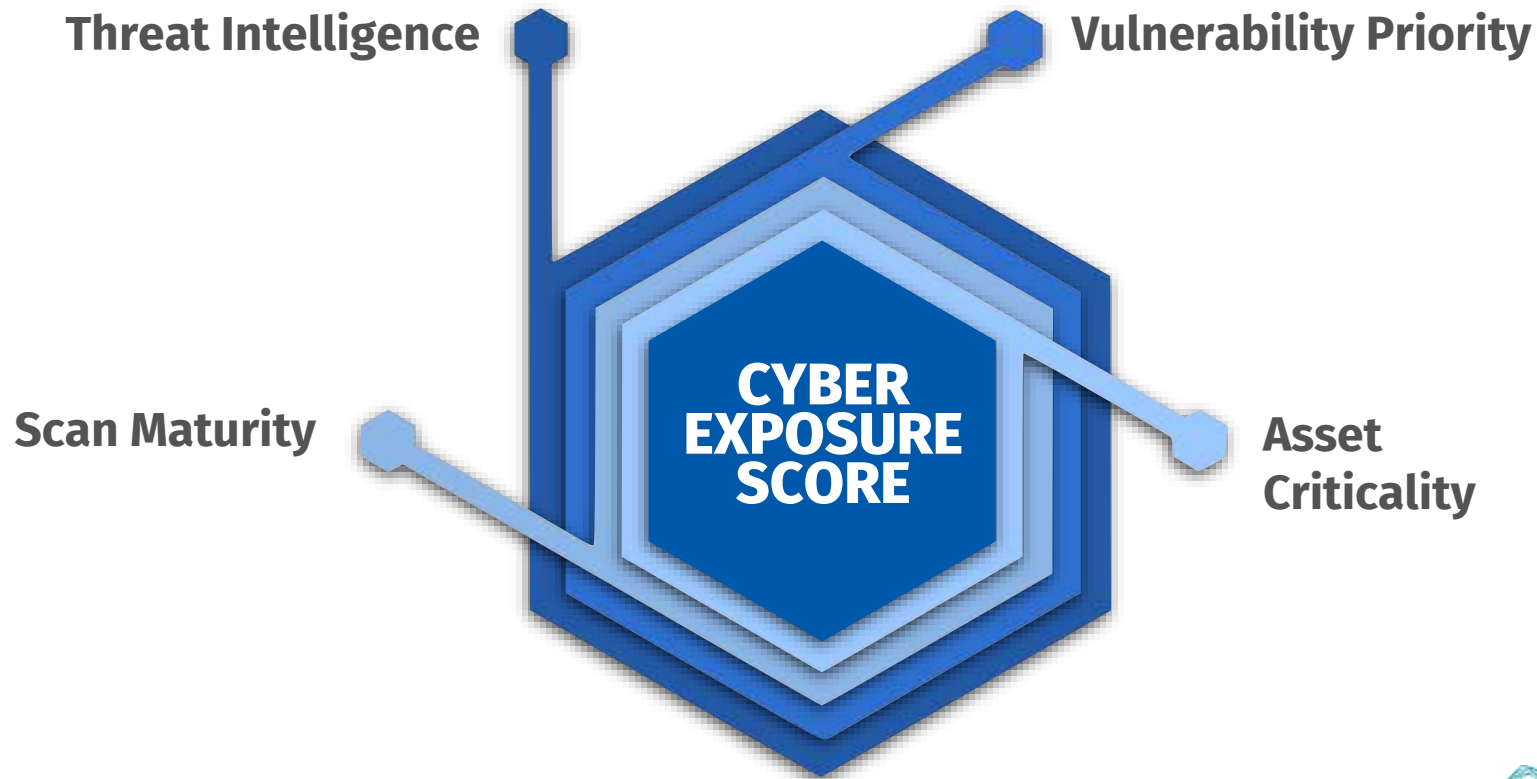

COMMUNICATE

Visualizations of the entire attack surface allow anyone – from analyst to executive – to quickly **understand and communicate their organization's Cyber Exposure**

COMPARE

Exposure quantification and benchmarking allow you to compare your effectiveness for internal operations and against peers – to **identify areas of focus and optimize security investments**

Leverage Context And Intelligence To Measure Your Risk

Prioritize based on importance of asset AND risks posed by vulnerabilities on the asset

VPR + ACR

VULNERABILITY PRIORITY RATING

ASSET CRITICALITY RATING

Leverage machine learning and threat intelligence to prioritize vulnerabilities based on real world risk

Prioritize assets based on indicators of business value and criticality

Focus First On What Matters Most
