EY helps companies overcome key challenges and changes in the business landscape.
Business Centric Cyber Security Services

► What is it?
► What’s different about it?
► What’s the benefit for our customers?
CISO Specific Challenges

Operational

► Securing company (and customer) data stored both on legacy technologies and in the cloud

► Being able to react to security incidents in an effective manner - Protection, Monitoring, Detection, Response and Remediation

► Staffing their security teams and making sure that those teams have the skillsets needed to be effective

Business

► Effectively communicating the business value of cybersecurity to executive leadership

► Aligning their program to the business

► Conforming to new regulations and compliance requirements
Managed Services delivered with Alliance Partners
