Press release

## Secardeo GmbH and MTG AG announce long-term cooperation

Nr. 2/ 2019

**Ismaning, May 27<sup>th</sup>, 2019 - Secardeo, a Certificate Management vendor and MTG, a solution provider of IoT security products, formally announce their partnership.**

Secardeo has won a valuable partner with MTG AG from Darmstadt who promotes the strategic business development.

"Strong partnerships are important in order to remain competitive in the IT security market and to offer customers tailor-made solutions that go beyond our own product range. With MTG, we have gained a cooperation partner that usefully expands our portfolio of CAs for Certificate Autoenrollment", says Dr. Gunnar Jacobson, Managing Director of Secardeo GmbH.

MTG AG, a software company founded in Darmstadt in 1995 and a leading provider of sophisticated encryption technologies, also benefits from this alliance.

Already at the end of 2018, a joint project was started in which a MTG customer, a large energy grid provider in the south of Germany, was served by Secardeo's "certEP" autoenrollment solution. This product enables the end customer to autoenroll their digital certificates with a non-Microsoft CA, thus completing the MTG product portfolio that does not yet have this feature.

The signs are good for the new partnership, as the companies Secardeo and MTG have many things in common: Innovative security software that protects critical infrastructures, experienced management teams who are passionate about reducing IT security risks and many well-known customers from diverse industries worldwide who trust in their solutions.
